Geospatial Tools for Urban Water Resources (Geotechnologies and the Environment)

This book examines the application of geotechniques to address a wide range of issues facing urban water resources. Growing populations leading to urbanization and related development have lead to problems associated with water quality, storm water management, flood control, environmental health, and related ecosystem impacts. Major cities and other urban areas are facing challenges in addressing the implications of impacts to water resources. Recent innovations in geotechnologies, including Geographic Information Science (GIS), remote sensing, and other spatial tools and techniques, provide great opportunities and potential to assist in dealing with these problems. This volume provides a series of case studies that examine the application of new methods and approaches in a range of geotechnologies as utilized to better understand and resolve urban water resource concerns in communities throughout the world. Computer based mapping, spatial analysis, satellite imagery, decision support systems, web based applications, aerial photography, and other methods are highlighted by their development and application. The research presented in this volume will provide for an excellent source of knowledge and learning to assist professionals, experts, and students with a better understanding of how the use of geotechnologies can be used to assist urban communities to address water resource challenges.

From reader reviews:

Tatum Martin:

Throughout other case, little men and women like to read book Geospatial Tools for Urban Water Resources (Geotechnologies and the Environment). You can choose the best book if you'd prefer reading a book. Provided that we know about how is important a book Geospatial Tools for Urban Water Resources (Geotechnologies and the Environment). You can add understanding and of course you can around the world with a book. Absolutely right, simply because from book you can understand everything! From your country until eventually foreign or abroad you will end up known. About simple matter until wonderful thing it is possible to know that. In this era, we are able to open a book or searching by internet unit. It is called e-book. You may use it when you feel bored to go to the library. Let's study.

Alison McGowan:

This Geospatial Tools for Urban Water Resources (Geotechnologies and the Environment) book is not really ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book is usually information inside this book incredible fresh, you will get details which is getting deeper you actually read a lot of information you will get. This Geospatial Tools for Urban Water Resources (Geotechnologies and the Environment) without we know teach the one who reading it become critical in pondering and analyzing. Don't end up being worry Geospatial Tools for Urban Water Resources (Geotechnologies and the Environment) can bring any time you are and not make your tote space or bookshelves' turn into full because you can have it inside your lovely laptop even phone. This Geospatial Tools for Urban Water Resources (Geotechnologies and the Environment) having great arrangement in word as well as layout, so you will not sense uninterested in reading.

Barbara Butler:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Try and pick one book that you never know the inside because don't assess book by its protect may doesn't work here is difficult job because you are afraid that the inside maybe not while fantastic as in the outside look likes. Maybe you answer might be Geospatial Tools for Urban Water Resources (Geotechnologies and the Environment) why because the great cover that make you consider concerning the content will not disappoint anyone. The inside or content will be fantastic as the outside or cover. Your reading 6th sense will directly make suggestions to pick up this book.

Gale Gibbs:

Is it you actually who having spare time after that spend it whole day by watching television programs or just laying on the bed? Do you need something new? This Geospatial Tools for Urban Water Resources (Geotechnologies and the Environment) can be the reply, oh how comes? A fresh book you know. You are therefore out of date, spending your free time by reading in this fresh era is common not a nerd activity. So

what these publications have than the others?
