Chemical Compounds in The Atmosphere T Graedel

Chemical Compounds in the Atmosphere deals with the chemistry of organic and inorganic compounds found in the atmosphere, including rare gases and compounds of oxygen and hydrogen, halogenated aromatic compounds, and organometallic compounds. The sources and concentrations of atmospheric trace gases are discussed, along with their chemical reactions and ultimate fates. The compounds are divided into groups on the basis of chemical constituent or chemical structure.

Comprised of 10 chapters, this book opens with an overview of atmospheric composition and atmospheric chemistry, followed by a discussion on inorganic compounds present in the troposphere such as rare gases and compounds containing nitrogen, sulfur, and halogens. The next chapters focus on hydrocarbons such as alkanes, alkenes, and alkynes; carbonyl compounds such as ketones and aldehydes; oxygenated and nitrogen- and sulfur-containing organic compounds; organic halogenated compounds such as mercaptans and thiocyanates; and organometallic compounds such as organophosphorus pesticides. The final chapter is a synthesis of data on atmospheric compounds mentioned in this text, with emphasis on their occurrence, sources, oxidation, and lifetimes. The chemistry of acid rain is also considered.

This monograph will be of value to those engaged in atmospheric measurements, theoretical and laboratory studies of chemical parameters relevant to the atmosphere, and air quality assessments.

From reader reviews:

Benita Eldridge:

What do you about book? It is not important along? Or just adding material when you need something to explain what the one you have problem? How about your spare time? Or are you busy person? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? All people has many questions above. They need to answer that question simply because just their can do which. It said that about guide. Book is familiar on every person. Yes, it is right. Because start from on guardería until university need this Chemical Compounds in The Atmosphere to read.

Manuel Britton:

This Chemical Compounds in The Atmosphere usually are reliable for you who want to be a successful person, why. The explanation of this Chemical Compounds in The Atmosphere can be one of many great books you must have is actually giving you more than just simple reading through food but feed an individual with information that might be will shock your earlier knowledge. This book is definitely handy, you can bring it everywhere and whenever your conditions throughout the e-book and printed types. Beside that this Chemical Compounds in The Atmosphere forcing you to have an enormous of experience for example rich vocabulary, giving you trial of critical thinking that we realize it useful in your day action. So , let's have it and enjoy reading.

Katrina Frey:

That publication can make you to feel relax. This book Chemical Compounds in The Atmosphere was bright colored and of course has pictures around. As we know that book Chemical Compounds in The Atmosphere has many kinds or style. Start from kids until youngsters. For example Naruto or Investigator Conan you can read and feel that you are the character on there. So , not at all of book are generally make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book for you and try to like reading which.

Verna Riddle:

What is your hobby? Have you heard that will question when you got students? We believe that that problem was given by teacher to their students. Many kinds of hobby, Every person has different hobby. And you know that little person just like reading or as reading through become their hobby. You should know that reading is very important as well as book as to be the thing. Book is important thing to increase you knowledge, except your current teacher or lecturer. You discover good news or update in relation to something by book. Many kinds of books that can you take to be your object. One of them are these claims Chemical Compounds in The Atmosphere.
