An Ecological Approach to Perceptual Learning and Development

Eleanor J. Gibson, Anne D. Pick

An Ecological Approach to Perceptual Learning and Development Eleanor J. Gibson, Anne D. Pick
The essential nature of learning is primarily thought of as a verbal process or function, but this notion conveys that pre-linguistic infants do not learn. Far from being "blank slates" that passively absorb environmental stimuli, infants are active learners who perceptually engage their environments and extract information from them before language is available. The ecological approach to perceiving--defined as "a theory about perceiving by active creatures who look and listen and move around"--was spearheaded by Eleanor and James Gibson in the 1950s and culminated in James Gibson's last book in 1979. Until now, no comprehensive theoretical statement of ecological development has been published since Eleanor Gibson's *Principles of Perceptual Learning and Development* (1969).

In *An Ecological Approach to Perceptual Learning and Development*, distinguished experimental psychologists Eleanor J. Gibson and Anne D. Pick provide a unique theoretical framework for the ecological approach to understanding perceptual learning and development. Perception, in accordance with James Gibson's views, entails a reciprocal relationship between a person and his or her environment: The environment provides resources and opportunities for the person, and the person gets information from and acts on the environment. The concept of affordance is central to this idea; the person acts on what the environment affords, as it is appropriate.

This extraordinary volume covers the development of perception in detail from birth through toddlerhood, beginning with the development of communication, going on to perceiving and acting on objects, and then to locomotion. It is more than a presentation of facts about perception as it develops. It outlines the ecological approach and shows how it underlies "higher" cognitive processes, such as concept formation, as well as discovery of the basic affordances of the environment. This impressive work should serve as the capstone for Eleanor J. Gibson's distinguished career as a developmental and experimental psychologist.

From reader reviews:

Max Norris:

Book is to be different for every single grade. Book for children till adult are different content. As we know that book is very important usually. The book An Ecological Approach to Perceptual Learning and Development had been making you to know about other expertise and of course you can take more information. It is extremely advantages for you. The book An Ecological Approach to Perceptual Learning and Development is not only giving you far more new information but also to get your friend when you experience bored. You can spend your personal spend time to read your book. Try to make relationship together with the book An Ecological Approach to Perceptual Learning and Development. You never sense lose out for everything should you read some books.

David Beall:

Are you kind of busy person, only have 10 or even 15 minute in your moment to upgrading your mind ability or thinking skill perhaps analytical thinking? Then you have problem with the book compared to can satisfy your limited time to read it because this all time you only find reserve that need more time to be go through. An Ecological Approach to Perceptual Learning and Development can be your answer because it can be read by a person who have those short time problems.

Carol Rosborough:

As we know that book is very important thing to add our expertise for everything. By a publication we can know everything we would like. A book is a list of written, printed, illustrated as well as blank sheet. Every year ended up being exactly added. This publication An Ecological Approach to Perceptual Learning and Development was filled about science. Spend your extra time to add your knowledge about your science competence. Some people has several feel when they reading a book. If you know how big selling point of a book, you can experience enjoy to read a book. In the modern era like at this point, many ways to get book that you simply wanted.

Rita Beatty:

As a college student exactly feel bored to help reading. If their teacher questioned them to go to the library in order to make summary for some guide, they are complained. Just very little students that has reading's internal or real their interest. They just do what the instructor want, like asked to the library. They go to at this time there but nothing reading seriously. Any students feel that reading is not important, boring along with can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this An Ecological Approach to Perceptual Learning and Development can make you truly feel more interested to read.
