Introduction to Coordination Chemistry (Inorganic Chemistry: A Textbook Series) Geoffrey A. Lawrance

At the heart of coordination chemistry lies the coordinate bond, in its simplest sense arising from donation of a pair of electrons from a donor atom to an empty orbital on a central metalloid or metal. Metals overwhelmingly exist as their cations, but these are rarely met 'naked' – they are clothed in an array of other atoms, molecules or ions that involve coordinate covalent bonds (hence the name coordination compounds). These metal ion complexes are ubiquitous in nature, and are central to an array of natural and synthetic reactions.

Written in a highly readable, descriptive and accessible style *Introduction to Coordination Chemistry* describes properties of coordination compounds such as colour, magnetism and reactivity as well as the logic in their assembly and nomenclature. It is illustrated with many examples of the importance of coordination chemistry in real life, and includes extensive references and a bibliography.

Introduction to Coordination Chemistry is a comprehensive and insightful discussion of one of the primary fields of study in Inorganic Chemistry for both undergraduate and non-specialist readers.

From reader reviews:

Kathy Wilson:

Book is to be different per grade. Book for children until adult are different content. To be sure that book is very important for people. The book Introduction to Coordination Chemistry (Inorganic Chemistry: A Textbook Series) had been making you to know about other understanding and of course you can take more information. It doesn't matter what advantages for you. The reserve Introduction to Coordination Chemistry (Inorganic Chemistry: A Textbook Series) is not only giving you far more new information but also to become your friend when you feel bored. You can spend your personal spend time to read your guide. Try to make relationship with the book Introduction to Coordination Chemistry (Inorganic Chemistry: A Textbook Series). You never feel lose out for everything should you read some books.

Lisa Gonzales:

The publication with title Introduction to Coordination Chemistry (Inorganic Chemistry: A Textbook Series) has lot of information that you can find out it. You can get a lot of benefit after read this book. This specific book exist new understanding the information that exist in this reserve represented the condition of the world right now. That is important to you to be aware of how the improvement of the world. This book will bring you in new era of the the positive effect. You can read the e-book in your smart phone, so you can read the idea anywhere you want.

Christina Love:

This Introduction to Coordination Chemistry (Inorganic Chemistry: A Textbook Series) is great publication for you because the content which can be full of information for you who always deal with world and also have to make decision every minute. This kind of book reveal it info accurately using great coordinate word or we can state no rambling sentences within it. So if you are read that hurriedly you can have whole facts in it. Doesn't mean it only provides you with straight forward sentences but tough core information with wonderful delivering sentences. Having Introduction to Coordination Chemistry (Inorganic Chemistry: A Textbook Series) in your hand like keeping the world in your arm, information in it is not ridiculous. We can say that no book that offer you world inside ten or fifteen minute right but this book already do that. So, it is good reading book. Hey there Mr. and Mrs. active do you still doubt that?

Noah Giles:

Is it a person who having spare time after that spend it whole day by simply watching television programs or just lying down on the bed? Do you need something new? This Introduction to Coordination Chemistry (Inorganic Chemistry: A Textbook Series) can be the solution, oh how comes? The new book you know. You are consequently out of date, spending your extra time by reading in this completely new era is common not a geek activity. So what these textbooks have than the others?
