JavaServer Faces Hans Bergsten

JavaServer Faces, or JSF, brings a component-based model to web application development that's similar to the model that's been used in standalone GUI applications for years. The technology builds on the experience gained from Java Servlets, JavaServer Pages, and numerous commercial and open source web application frameworks that simplify the development process. In *JavaServer Faces*, developers learn how to use this new framework to build real-world web applications. The book contains everything you'll need: how to construct the HTML on the front end; how to create the user interface components that connect the front end to your business objects; how to write a back-end that's JSF-friendly; and how to create the deployment descriptors that tie everything together. *JavaServer Faces* pays particular attention to simple tasks that are easily ignored, but crucial to any real application: working with tabular data, for example, or enabling and disabling buttons. And this book doesn't hide from the trickier issues, like creating custom components or creating renderers for different presentation layers. Whether you're experienced with JSF or a just starting out, you'll find everything you need to know about this technology in this book. Topics covered include:

- The JSF environment
- Creating and rendering components
- Validating input
- Handling user-generated events
- Controlling page navigation
- Working with tabular data
- Internationalization
- Integration between JSF and Struts
- Developing custom renderers and custom components

JavaServer Faces is a complete guide to the crucial new JSF technology. If you develop web applications, JSF belongs in your toolkit, and this book belongs in your library.

From reader reviews:

Mary Case:

As people who live in typically the modest era should be upgrade about what going on or info even knowledge to make these individuals keep up with the era that is always change and move forward. Some of you maybe will update themselves by examining books. It is a good choice for you personally but the problems coming to you is you don't know what kind you should start with. This JavaServer Faces is our recommendation so you keep up with the world. Why, because this book serves what you want and wish in this era.

Jennifer McMorris:

Playing with family in a park, coming to see the water world or hanging out with buddies is thing that usually you might have done when you have spare time, and then why you don't try matter that really opposite from that. Just one activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love JavaServer Faces, it is possible to enjoy both. It is good combination right, you still need to miss it? What kind of hangout type is it? Oh come on its mind hangout men. What? Still don't get it, oh come on its referred to as reading friends.

Myra Coronado:

Can you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Make an effort to pick one book that you find out the inside because don't judge book by its include may doesn't work at this point is difficult job because you are afraid that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer is usually JavaServer Faces why because the wonderful cover that make you consider concerning the content will not disappoint anyone. The inside or content is fantastic as the outside as well as cover. Your reading 6th sense will directly show you to pick up this book.

Rodney Natale:

Many people spending their time frame by playing outside with friends, fun activity along with family or just watching TV the entire day. You can have new activity to invest your whole day by looking at a book. Ugh, you think reading a book can definitely hard because you have to accept the book everywhere? It ok you can have the e-book, getting everywhere you want in your Mobile phone. Like JavaServer Faces which is getting the e-book version. So , why not try out this book? Let's observe.
